Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 15 June 2000.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted, on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-8 are rejected under 35 U.S.C. 102(e) as being anticipated by Lee (US Patent 6,373,913).

Regarding claim 1, Lee discloses an Internal Clock Signal Generator Including Circuit For Accurately Synchronizing Internal Clock Signal With External Clock Signal, which teaches all the claimed subject matter “a polyphase clock generation circuit...with respect to the input clock” in claim 1 as follows. Lee teaches a polyphase clock generation circuit in Figure 5. Further, Lee teaches the generated clock signal is to be an integer multiple of the input clock circuit (column 6, lines 23-27).

Regarding claim 2, Lee further teaches the claimed subject matter, note figure 5.

Regarding claim 3, Lee further teaches the claimed subject matter, note figure 6.

Regarding claim 4, see figure 7. Lee does not explicitly teach a "constant timing", however, the functionality of the reset signal is the same.

Regarding claim 5, Lee further teaches the claimed subject matter, note column 7, lines 38-45. Lee does not explicitly teaches "sampling an output from the detection circuit a plurality of times", however, the functionality of the comparison circuits are the same.

Regarding claim 6, see claim 4.

Regarding claim 7, Lee further teach the claimed subject matter, note column 3, lines 57-67. Lee does not explicitly teach "held at the time of bit data reception", however, the functionality of the flag signal for enabling the DLL or the PLL is the same.

Regarding claim 8, Lee further teaches the claimed subject matter, note column 4, lines 3-17.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 9 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The phrase "The bit synchronizing circuit of claim 9" is indefinite concerning what limitations are inherently claimed by claim 9.
